A limited Market Reef (OJ0) activation during the IOTA Contest...
Press Release 23 July 2012
Next Friday morning on the 27th of July a group consisting of Nigel G3TXF, Don G3XTT, Tore SM0DZB and Teemu SM0W will attempt to land on Market Reef (OJ0), now from Sweden, with a small boat to activate the Reef during the IOTA contest as OJ0R, EU-053. During last winter the Lighthouse on the Reef lost all permanent antennas plus the wind generator, so the team will put up several vertical antennas and dipoles and run modest power.
The main goal for the team on this trip will be to prepare for a new permanent antenna installation that will be done later in August. SM0W will also collaborate with the Finnish Lighthouse Society to find a good permanent solution for the electricity for future activations. They will still try to keep at least one station open for the IOTA contest. The team will try to leave the Reef early Monday morning on the 30th of July, says team leader Teemu, SM0W. For more information see: www.qrz.com/db/oj0r
